IV. New business

A. RAISING THE R. V. GATE. From Craig Baldwin, Contracts Coordinator, "We are recommending the RV gate be raised and a new concrete/asphalt drive be installed in order for the gate to be above ground. The pitch of the new drive is recommended to be 1 inch to each foot. This would keep any size R.V. from scraping when entering and exiting. A bid has been requested of AJI for the cost of raising the gate."
